DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species 1: a scanning image formation optical system for use in an optical scanner with two or more optical elements wherein at least two special tilt surfaces are formed on different optical elements. Claims 3 – 7, 14 – 18, and 38 - 42.

Species 2: a scanning image formation optical system for use in an optical scanner wherein the optical system is an anamorphic optical system having a geometrically conjugate relation in a sub-scanning direction between a vicinity of the deflecting reflective surface of the optical deflector and a position of the scanned surface. Claims 8 – 11, 19 – 27, 30, 31, and 43 - 51.

Species 3: a scanning image formation optical system for use in an optical scanner with a light source configured to emit one or more luminous fluxes wherein at least one luminous flux is incident on a deflecting reflective surface of an optical deflector. Claims 28, 29, 32 – 35, and 52 - 59.

Species 4: a scanning image formation optical system for use in an optical scanner that forms a latent image on a photosensitive medium wherein the latent image is visualized. Claims 60 - 62.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 2, 12, 13, 36, and 37 are generic.

Art Unit: 2872

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was not made to request an oral election to the above restriction requirement.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Denise S Allen whose telephone number is (703) 305-7407. The examiner can normally be reached on Monday - Friday, 8:30am - 5:00pm.

Art Unit: 2872

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Drew A Dunn can be reached on (703) 305-0024. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9318 for regular communications and (703) 872-9319 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1782.
